Take charge the
real smart way

There are charging stations, and then there's Smappee. Smarter. Better looking. And more cost-effective too. Smappee combines all the good things you wish for in a charger. Beautiful design that you can be proud of backed by sophisticated technology. So that you can be sure that driver needs are always met, while you are able to use energy wiser and in the most efficient way. That is why those who want to be confident, and smartly save, choose Smappee.

Discover our smart charging solutions that perfectly fit your business.

Be smart

Smappee's built-in smartness helps you save.

Always meet driver needs

Basic chargers charge each car at the same speed, but Smappee's sophisticated technology allows for setting different charging requirements for various users. This means drivers will always be charged when they need to be.

Charge at the best price

Our smart charging system has built-in solar forecasting, making it possible for you to optimally charge your electric vehicle with solar power. It also cleverly regulates charging around the time with the lowest grid tariffs. Plus, it makes it possible for you to choose your preferred capacity limit to easily side-step exorbitant capacity rates. This way you can save up to 50 % on charging costs.

Meet energy demand without fail

Charging a fleet of electrical cars places a huge demand on the power supply of your building. With Smappee's dynamic overload protection, you don't need to worry about tripped switches, cars not charging, or having to fork out for big upgrades of your electrical infrastructure. In fact, our system helps everything run smoothly while you save up to 25 % of your installation budget.

Manage your energy wisely

The Smappee Infinity energy management system that integrates with our charging infrastructure not only helps you charge smarter but also creates smart insights into the energy consumption of your building. So, you will have all you need to make wise energy choices and save.

Be confident

One entire solution that gives you full control over charging an entire fleet.

Have control with one complete solution

Setting up charging infrastructure for your fleet requires a balanced eco-system, from ensuring that your building can supply enough power, to choosing the best chargers, installation, management system and payment solutions. Smappee makes life simple with just one fully integrated solution which you can depend on.

Manage easily with our handy dashboard

Smappee's powerful management dashboard makes it easy to keep tabs on your entire fleet and charging infrastructure while the Smappee App keeps drivers in charge of their charging sessions.

Easy ways to pay and unlock charging

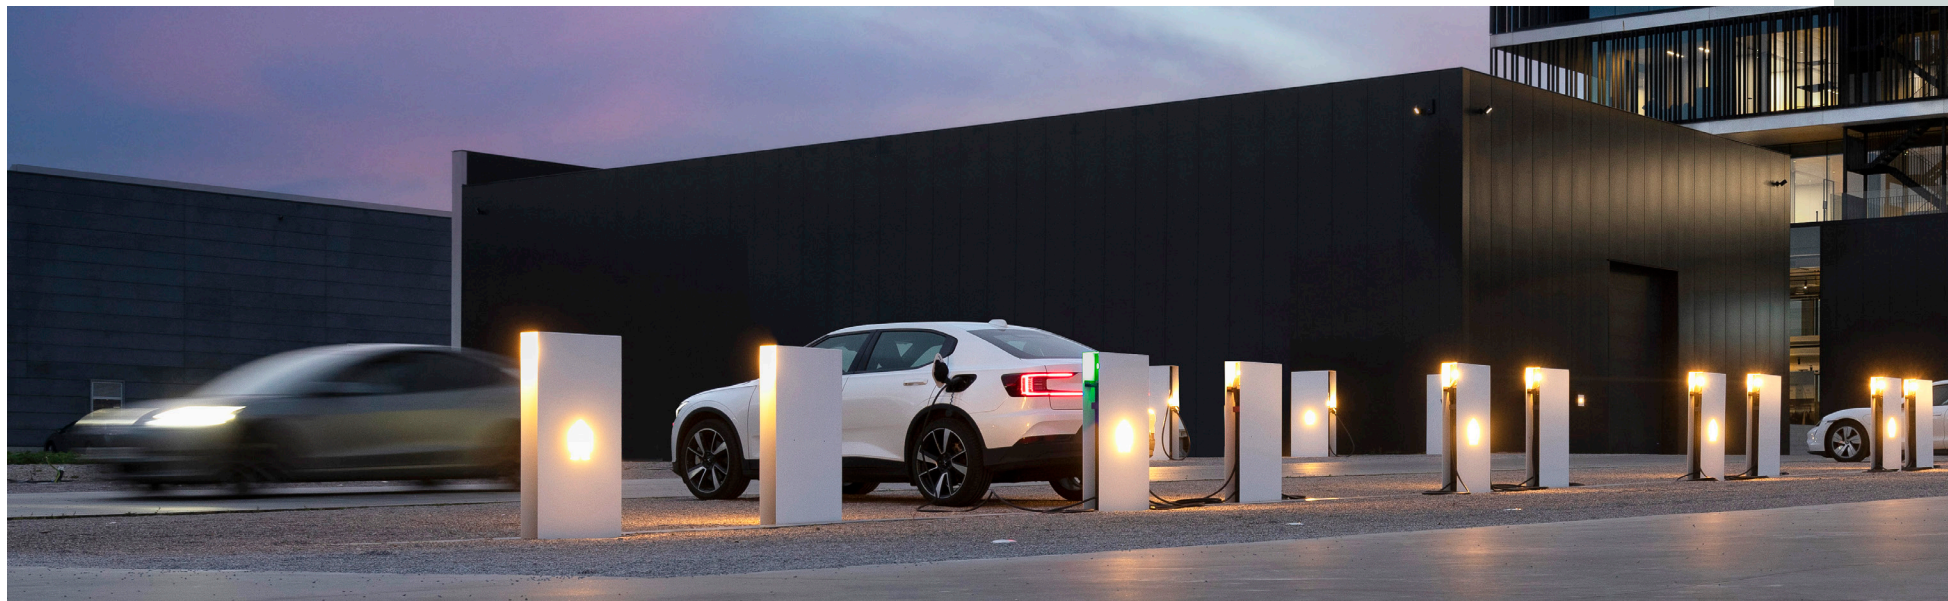

Starting charging sessions with Smappee is as easy as counting to three. You can simply plug in to start charging, scan the QR code and pay by credit card or use the Smappee Smart Charge card (certain regions), as well as the most common charging cards and RFID tokens.

Always futureproof thanks to the Smappee Cloud

Smappee reassures with smart EV chargers ready to withstand the test of time. Through the Smappee Cloud, your data is not only safeguarded but your charging system can also continually be upgraded with new features and technologies.

Trust in Smappee Certified installers

Our installer network is qualified through the Smappee Academy to make the installation of your charging infrastructure completely worry-free. Smappee Certified installers are underpinned by the highly-rated Smappee support team.

Be stylish

A charger that you can be proud of
with trusted Belgian quality.

Award-winning design

The beautiful Smappee family of EV line chargers was specially created with design-forward thinking to best complement your business. A job we took so seriously that we racked up accolades, such as the iF Design award and Henry Van de Velde design awards. Whether free-standing or wall mounted, in your driveway or parking area, the seamless minimalistic design of our chargers is sure to complement any environment from traditional architecture to modern design.

Belgian quality

Smappee is a cleantech business with a strong intellect in the development and production of high-quality energy solutions. The innovation, design and manufacturing of Smappee's EV Line of chargers fully take place in Belgium. We attach great importance to the quality of our products and services and your satisfaction as our customer is central to our business.

Be green

The right choice for humankind
and the future of our planet.

Green in function

Doing your bit for the planet is something to feel good about. Smappee is here to help make your change-over to e-mobility as easy and enjoyable as possible. We make it simple, not only with our advanced cleantech which helps you charge in the most efficient way with renewable energy, but also in designing our products with a sustainability-first mindset.

Smartly sustainable by design

Smappee chargers are locally manufactured in Belgium and made in 100 % multi-recyclable aluminum which takes 40x less energy to recycle. Also designed with the minimal use of plastic and packaged in recycled cardboard, it has an intrinsic durability through the choice of materials, production method and life-cycle management. We continue to take steps to design our products for a greener future.

EV Line

The smartest charging solution for your business, on the road or at home.

Charging Management

Charging management software for your business.

Charging management platform

Smappee's charging management platform takes care of all aspects of electric charging, from giving drivers control of their charging sessions to helping you manage your electric fleet remotely and in real-time. You can easily monitor charging and energy consumption costs, set priority charging and reimburse your employees for charging sessions at home. You can even open your charger for public charging. All from the convenience of your office desk.

- because efficiency pays
- everything always under control
- charging at work and home
- installed by a professional
